

## GENERAL INFORMATION TECHNOLOGY

### “YOU ARE NOT ALONE”

Whether you own one PC in one office or 100 PCs across multiple locations, we make sure your technology is at its peak performance. From routine maintenance to network engineering and design we have the tools and expertise you need to be the most successful business. With us by your side your dreams become reality.

We offer custom built products and systems that will enable your business to be unique and productive. [Technology Solutions of Michigan](#) also provides the ongoing support you need for these. Don't worry about malware, spyware or viruses ruining your data because we handle these as well. In addition, our team can design and develop your website.

We provide installation and maintenance services to keep your business up to date and running smoothly. We have expertise for individual PCs and network servers so you don't have to call anyone else regardless how big or small you are.

## VoIP PHONE SYSTEM

“FORGET YOUR  
TRADITIONAL IDEA  
OF BUSINESS  
PHONE LINES”

Your current phone system may be working fine but its costs, performance and capabilities are no longer current. The VoIP systems that [Technology Solutions of Michigan](#) offers will give your business what it needs to be competitive and run efficiently. Where ever your business takes you, VoIP will provide seamless communication between you, your employees and your customers.

VoIP phone systems' average cost is half of a traditional phone system. A VoIP phone has many features that an analog phone doesn't support, such as remote extensions and touch screen capabilities. It can be customized for your needs and will take your business to the next level.

Some highlights of the VoIP system include flexible number of extensions and voicemail boxes, visual voicemail, voicemail in your email inbox and interaction with other devices such as your cell phone. It also comes with a digital receptionist so you will never miss a call and computer-based one click calling with Zulu.

## ACCESS CONTROL

**“NO LONGER FEAR THE STRANGER WHO GOT IN”**

Have peace of mind at all times knowing that you have an access control system in place that tracks who is coming and going and at what time. You will have a system that is affordable, customizable and will lower asset loss. We will provide you with a truly secure environment and the ability to use your desktop, laptop, smartphone or tablet to manage it. Technology Solutions of Michigan can install door locks that know who opened the door and at what time. This data is stored in your system or the cloud and then you can view it at any time.

## BACKUP AND DISASTER RECOVERY

**“BE SECONDS AWAY FROM YOUR DATA”**

Disasters will occur due to various factors; hardware failure, human error, software failure, ransomware and natural disasters just to name a few. When this disaster strikes, all your data is at risk and downtime may be inevitable. Our services can ensure data protection, data security, instant recovery, reduce downtime and ensure continuity. Technology Solutions of Michigan will make sure that your entire business structure can be recovered within seconds. The ability to keep doing business as normal in the event of a disaster has immeasurable value.

## MOBILE APPLICATIONS

**“RELEASE THE BEAST INSIDE YOUR MOBILE PHONE”**

Mobile applications were originally offered for general productivity and information retrieval, including email, calendar, contacts, stock market and weather information. However, public demand and the availability of developer tools has driven rapid expansion into other categories. Technology changes rapidly. To stay competitive, you need to make sure that you are on top of your digital transformation and application modernization process.

Technology Solutions of Michigan will provide you with mobile applications compatible with your smartphone and tablet that are easily accessible, user friendly and tailored to your needs. Anyone will be able to do business no matter where they are with their devices. If you can dream it, we can build it.

## WEB APPLICATIONS

**“INSTANT ACCESS TO YOUR INFORMATION, FROM ANYWHERE, AT ANY TIME”**

Access to your business information at any time and from any location is key to your success. Web applications allow you to have instant, real-time access to your data. In addition, any application you dream up, Technology Solutions of Michigan can make a reality.

From accounting to project management to HR, most daily tasks that businesses perform can be automated and the best way to do this is to utilize a web-based application. This will provide cost savings, real-time updates to your website, increased productivity and potential increased sales.
